

Mechanisms & Measures for Water Quality

2014-20

James LePage (Natural England)

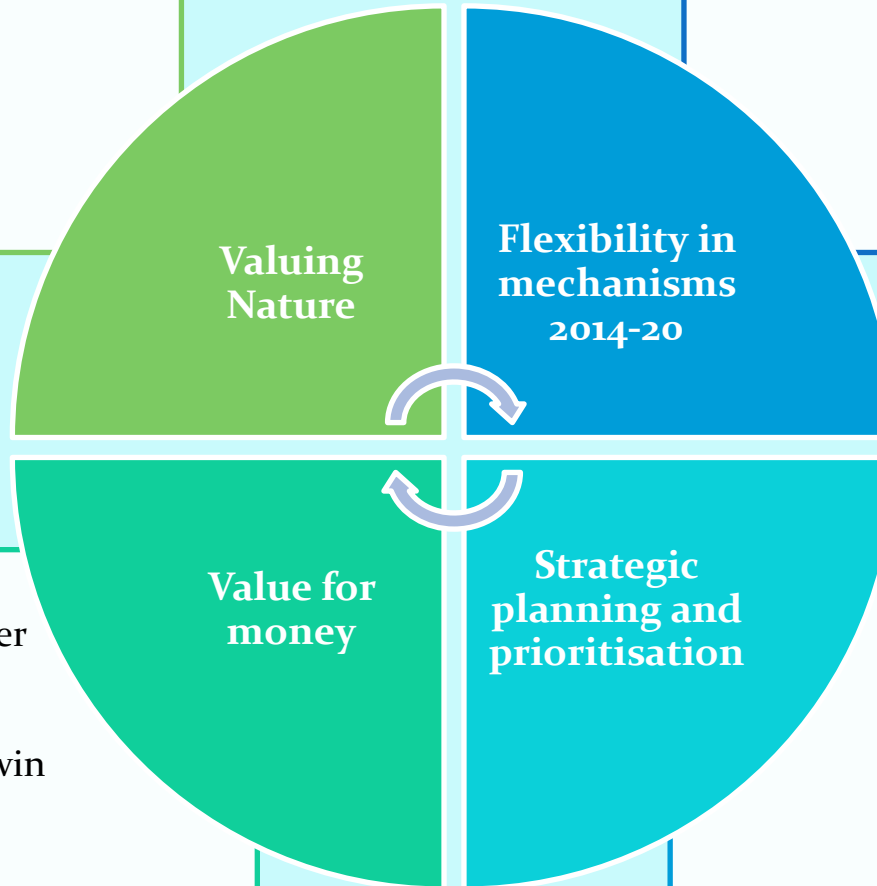

Matching Measures to Mechanisms

Mechanisms Review: messages

- “Green Infrastructure”
- “Public Goods”
- Legal requirements

- Regulation
- CAP P1 & P2
- Private sector – increasing?
- Grants or loans?

- Interventions to deliver multiple outcomes
- Maximising overlaps between priorities & win wins
- Prioritisation framework trade-offs

- More spatially defined
- Holistic
- Shared
- Locally relevant

Agri-environment – ‘Straw Man’ scenarios

		CAP Pillar 1 Greening Scenarios	
		National Environmental Certification scheme (similar ambition to ELS)	EU Commission Greening Proposals or directly equivalent certification scheme
CAP Pillar 2 (RDP) Environmental Land Management Budget Scenarios	Cautiously optimistic £400m/yr	<p>Straw man A Pillar 1 delivers ELS benefits, ELS not required in P2 Pillar 2 Budget £400m/yr</p>	<p>Straw man B Pillar 1 contributes minimal environmental benefits Pillar 2 Budget £400m/yr</p>
	Constrained £300m/yr	<p>Straw man C Pillar 1 delivers ELS benefits ELS not required in P2 Pillar 2 Budget £300m/yr</p>	<p>Straw man D Pillar 1 doesn't Pillar 2 Budget £300m/yr</p>

Using DTC Experience - measures

- What do we know about the efficacy of and potential application of measures:-
 - What measures, where and what level of uptake?
 - Cost effectiveness
 - Wider benefits (multiple outcomes/value for money)?
- Have we got the current balance of basic and supplementary measures right to deliver WFD objectives?

Using DTC Experience - mechanisms

- What messages are there on the suitability and potential of mechanisms:
 - Regulation vs incentive ?
 - Incentives: linking government and private funds?
 - Role of supply chain, advice, demonstration?
 - Property rights?
- What lessons to learn from the field on:
 - Planning, Targeting
 - Delivery and Engagement
 - Monitoring
 - Cost effectiveness
